- Presence in international trade shows
- Logistics provided out of Brazil and/or Miami.
- International Awards for Innovation and trends
- Export of technology

ACTIVE INGREDIENTS RESPONSIBLE FOR THE STRAIGHTENING RESULTS OF FASHION CANDY

Organic Acids

Lactic Acid - Responsible for controlling the pH. It maintains the cuticle closed and provides the intense shine to the hair.

Glycolic Acid - In our formulation it intensifies the straightness of the hair and it helps fixate the active ingredients to the hair strands. It also provides protection to the hair against free radicals.

Inca Oil - Rich in omega 3,6 and 9. Includes presence of the following fatty acids: Linolenic Acid, Arachidonic Acid and Oleic Acid. Acting all together, they potentiate and prolong the straightening action in the hair. Besides the previous qualities, these acids possess high molecular weight which also aid in controlling the frizz in the hair.

Coconut Oil - It contains the following fatty acids: Caprylic Acid, Lauric Acid, Miristic Acid. All these acids together will provide a stronger alignment of the hair strands and sealing of the cuticle.

Quinoa Protein - Controls the damage inside and outside of the internal portion of the hair strands. It contains all the essential amino acids.

AFTERCARE PRODUCTS

LUZES AND MECHAS

Shampoo and conditioner

Balancing and enhancing the golden tones

The Luzes & Mechas line of products eliminates the dryness caused by coloring, bleaching and the sunlight. In addition to this, it neutralizes the yellowish colour fibers. Its formula has jojoba oil and UV filter, with potent antioxidant action and advanced protection of color.

PÓS-COLORAÇÃO

Shampoo, conditioning mask and Intensive reconstructive treatment

Greater intensity for coloured hair

Designed to be used after any hair colouring process, its exclusive formula is composed of Astaxanthin which is one of the most powerful antioxidants in the world, even more so than the antioxidants contained in grapes. Its continued use slows down the process of fading color, leaving the hair looking more vibrant for a longer period of time.

YBERA POS-PROGRESSIVA

Shampoo and conditioner

For Brazilian smoothing treatment

These innovative products give hair continuous, long lasting protection as well as maintaining and pro-longing the sleek effect of straightening. Hair is treated to the replenishment of essential vitamins and nutrients which in turn, gives hair complete hydration, protection and silky-softness. These products are salt free and its formula contains hyaluronic acid which is designed to prolong the straightening effect.

YBERA SOFT CARE

Gentle Shampoo and Conditioner

For all hair types

If you love your hair then treat it to Soft Care which contains extracts of lemon grass, mint and rosemary devised to stimulate, purify and refresh giving long-lasting hydration. Ideal before or after chemical treatment – your hair will thank you for the TLC it deserves.

YBERA MIRRA REPAIR

Intensive Hydration Shampoo, Intensive Hydration Hair Mask, Protein Spray & Oil of Myrrh Serum

For pre and post chemically treated haircare

These sumptuous hair products are for preparing the hair for Brazilian straightening and maintaining great condition. Use before or after treatment to guarantee replenishing vital lost nutrients. The specialist formula restores every strand of hair through a deep moisturising process, the results? Hair has a luxury sheen, strength, softness and manageability. Using Oleo De Mirra will bring back lost nutrients, recover dryness and brittle hair and restore the hair's natural beauty. These products are salt free and are designed to prolong the hair straightening effect.
